Planetary scientist and educator Ken Coles has teamed up with Ken Tanaka from the United States Geological Survey's Astrogeology team, and Phil Christensen, Principal Investigator of the Mars Odyssey orbiter's THEMIS science team, to produce this all-purpose reference atlas, The Atlas of Mars. Each of the thirty standard charts includes: a full-page color topographic map at 1:10,000,000 scale, a THEMIS daytime infrared map at the same scale with features labeled, a simplified geologic map of the corresponding area, and a section describing prominent features of interest. The Atlas is rounded out with extensive material on Mars' global characteristics, regional geography and geology, a glossary of terms, and an indexed gazetteer of up-to-date Martian feature names and nomenclature. This is an essential guide for a broad readership of academics, students, amateur astronomers, and space enthusiasts, replacing the NASA atlas from the 1970s.

The third volume of the Studies in Ancient Greek narrative deals with the narratological category of space: how is space, including objects which function as 'props', presented in narrative texts and what

are its functions (thematic, symbolic, psychologising, or characterising).

Almost fifteen per cent of the world's population today experiences some form of mental or physical disability and society tries to accommodate their needs. But what was the situation in the Roman world? Was there a concept of disability? How were the disabled treated? How did they manage in their daily lives? What answers did medical doctors, philosophers and patristic writers give for their problems? This book, the first monograph on the subject in English, explores the medical and material contexts for disability in the ancient world, and discusses the chances of survival for those who were born with a handicap. It covers the various sorts of disability: mental problems, blindness, deafness and deaf-muteness, speech impairment and mobility impairment, and includes discussions of famous instances of disability from the ancient world, such as the madness of Emperor Caligula, the stuttering of Emperor Claudius and the blindness of Homer.
