Briggs & Stratton Spare Parts - Mower  
Magic

Briggs & Stratton are a manufacturer of small engines typically used in garden equipment, such as lawnmowers, snow blowers and garden tillers. Because these engines are on the smaller side, it's important that they don't work at a speed above their capacity. But they also need to generate enough power to actually work. In order for a Briggs & Stratton product to work safely and efficiently ...

Twenty-five years ago, how many  
people were thinking about the internet  
on a daily basis? Now you can find  
everything, including technical and  
instruction manuals, online. But some  
things never change. Users still need  
instructions and warnings to guide  
them in the safe and proper use of  
products. Good design, clear

Technology is changing the way we do business, the way we communicate with each other, and the way we learn. This new edition is intended to help technical writers, graphic artists, engineers, and others who are charged with producing product documentation in the rapidly changing technological world. While preserving the basic guidelines for developing manuals and warnings presented in the previous edition, this new edition offers new material as well, including a much-expanded section on hazard analysis. Features Provides more explicit guidance on conducting a hazard analysis, including methods and documentation Offers in-depth discussion of digital platforms, including video, animations, and even

virtual reality, to provide users with operating instructions and safety information Incorporates current research into effective cross-cultural communication—essential in today's global economy Explains new US and international standards for warning labels and product instructions Presents expanded material on user analysis, including addressing generational differences in experience and preferred learning styles Writing and Designing Manuals and Warnings, Fifth Edition explores how emerging technologies are changing the world of product documentation from videos to virtual reality and all points in between.

Our 1972 motorcycle ride took us on a four-thousand-mile trip from Arizona to

Canada and back. Some nights we camped out along the highway; other nights we found a motel. Some days the rain was fierce and debilitating... but every day was fun and filled with great experiences and amazing landscapes. Each of us rode a 500cc two-stroke motorcycle on the journey. We had no cell phones, roadside assistance coverage, custom ear plugs, or sound systems. The attractions of the open road, Canada, and Yellowstone Park were very powerful. None of us worried about breaking down or the costs of the trip. We were filled with youthful confidence in ourselves and our machines. The three of us had places to go and places to see. And we made it!
