From the bestselling adult author of The No. 1 Ladies' Detective Agency series as well as the middle-grade series School Ship Tobermory comes an exciting tale of bravery set in and around the circus, with fun, energetic illustrations throughout. Freddie Mole loves his family They are tight-knit, but they struggle day to day to make ends meet. Times are tough, and Freddie is determined to help. Then Freddie finds out about a job opening at a local circus—and he can't believe his luck when he is hired. At the circus, Freddie sweeps and cleans and is praised for his work. One thing leads to another, and he's asked to be understudy for some of the acts. The trapeze stunts are daunting enough—can Freddie face the lion's cage?

The essential guide for anyone - lay or ordained - who leads intercessions in their local church. Ideal both as a source of inspiration for experts and a training tool for beginners.

Ghost stories for the digital age by the Booker Prize/longlisted author of The Wall. In 2017, inspired in part by Henry James' The Turn of the Screw, the acclaimed English novelist John Lanchester published a ghost story in The New Yorker. "Signal," an eerie story of contemporary life and the perils of technology, was a sensation among readers/and since then Lanchester has written several more. Reality and Other Stories gathers the best of these, taking readers to an uncanny world familiar to fans of The Twilight Zone or Black Mirror. Household gizmos with a mind of their own. Mysterious cell-phone calls from unknown numbers. Reality TV shows and the creeping suspicion that none of this is real! Reality and Other Stories is a book of disquiet that captures the severe disconnection and distraction of our time.

The late Seventies to the early Nineties was a completely unique period in the history of computing. Long before Microsoft and Intel ruled the PC world, a disparate variety of home computers, from an unlikely array of suppliers, were engaging in a battle that would shape the industry for years to come. Products from established electronics giants clashed with machines which often appeared to have been (or actually were) assembled in a backyard shed by an eccentric inventor. University professors were competing head to head with students in their parents' garages. Compatibility? Forget it! Each of these computers was its own machine and had no intention of talking to anything else. The same could be said of their owners, in fact, who passionately defended their machines with a belief that verged on the religious. This book tells the story behind 40 classic home computers of an infamous decade, from the dreams and inspiration, through passionate inventors and corporate power struggles, to their final inevitable demise. It takes a detailed look at every important computer from the start of the home computer revolution with the MITS Altair, to the NeXT cube, pehaps the last serious challenger in the personal computer marketplace. In the thirteen years between the launch of those systems, there has never been a more frenetic period of technical advance, refinement, and marketing, and this book covers all the important steps made on both sides of the Atlantic. Whether it's the miniaturization of the Sinclair machines, the gaming prowess of the Amiga, or the fermenting war between Apple Computer, "Big Blue," and "the cloners," we've got it covered. Digital Retro is an essential read for anyone who owned a home computer in the Eighties.
