equipment that is used to connect and disconnect the transmission and the engine as needed. In a manual transmission, that piece is called a clutch, and in an automatic transmission, it's a torque converter. In order to swap your automatic transmission for a manual (or vice versa if that's your objective), you'll need to disconnect the current coupling material and install the new one.

Step 1. Remove the existing gear shift linkage, if it is a column shift, or the shifter, if it is floor-mounted. If it is a column mount, use a small hammer and tap out the roll pin holding the gear shift lever. Remove the shift cable from the lever at the base of the column and pull it through the firewall.

Take the red/lt blue striped wire, and splice it to one of the red/lt blue wires on the C5 switch. Take the Pink and red/white striped wires and splice them to the other red/lt blue striped wire on the C5 switch. The other 2 wires you are left with are the black/purple and black/orange wires for the reverse lights.
