The tourism industry has increasingly recognized and responded to growing environmental concerns. In recent years, there has been an emergence of a variety of categories of tourism considered more environmentally friendly: green, eco-tourism, and sustainable tourism. Much of the literature that has addressed these developments has been orientated to the destination locale or specific to a development. These texts have not sought to investigate and examine the response of government/national tourist organizations to the international sustainability agenda and the responses/actions of tourism enterprises to this "greening" agenda. This text aims to address this remarkable gap. This indispensable contribution to the field provides a comprehensive, state of the art perspective on progress towards the objectives of sustainable development within the tourism sector across the globe by focusing on the environmental performance and adoption of environmental management systems by tourism enterprises.

Electric and Hybrid Vehicles: Power Sources, Models, Sustainability, Infrastructure and the Market reviews the performance, cost, safety, and sustainability of battery systems for hybrid electric vehicles (HEVs) and electric vehicles (EVs), including nickel-metal hydride batteries and Li-ion batteries. Throughout this book, especially in the first chapters, alternative vehicles with different power trains are compared in terms of lifetime cost, fuel consumption, and environmental impact. The emissions of greenhouse gases are particularly dealt with. The improvement of the battery, or fuel cell, performance and governmental incentives will play a fundamental role in determining how far and how substantial alternative vehicles will penetrate into the market. An adequate recharging infrastructure is of paramount importance for the diffusion of vehicles powered by batteries and fuel cells, as it may contribute to overcome the so-called range anxiety." Thus, proposed battery charging techniques are summarized and hydrogen refueling stations are described. The final chapter reviews the state of the art of the current models of hybrid and electric vehicles along with the powertrain solutions adopted by the major automakers. Contributions from the worlds leading industry and research experts Executive summaries of specific case studies Information on basic research and application approaches

Through reports nationwide, including the Wall Street Journal and TV news, Americans are discovering Faith Fowler's ideas for transforming lives in Detroit's Cass Corridor. Known for her deep faith and creative ideas, Faith serves as one of the city's leading pastors and as a nonprofit entrepreneur. As a co-founder of a wide array of Cass startups, Faith and her Cass community are turning one of the nation's most impoverished urban centers into a gold mine of talent and resources. Now, Faith Fowler shares dozens of inspiring true stories of men and women who found new hope and were able to join in building a healthier community through Cass. Mitch Albom says: "The world waits for people like Faith Fowler. ... This memoir, like the author herself, is funny, poignant, moving, beautifully staged and oozing with a commitment to a simple yet profound idea: that other people are worth the trouble." From turning trash heaps of old tires into a stylish line of sandals to a host of other startup businesses, Faith's work at Cass already has drawn nationwide attention. Headlines have chronicled her innovative ideas and her infectious belief that each and every life is valuable, despite the ravages of homelessness, addiction and violence. In this book, she shares the best of this inspiring community through stories of lives renewed and transformed. This is the first book published by Faith Fowler's latest entrepreneurial venture. Cass Community Publishing House is the first interfaith publishing house established in the city of Detroit in more than two centuries—since Father Gabriel Richard, a Catholic priest and co-founder of the University of Michigan, hauled the first printing press into Detroit and invited his Presbyterian friend the Rev. John Monteith to publish with him. Like Richard and Monteith before her, Faith Fowler's work is one reason that Detroit is recognized as a center of hope for those who believe peace is possible in our ever-more-diverse world. Mitch Albom urges: "Everyone, religious or not, should read these pages."
