The mountain of the moon is a story about taking a chance dare which, with its wings of imagination, leads you to the silver lining after a storm. Shankar, an ordinary young boy from rural India, crosses many skies and seas to explore an altogether different world—africa. There, he joins a seasoned Portuguese Explorer, Diego alvarez on a daring mission. But is the destination worth the toil of the journey? Moreover, will Shankar get to the peak of his mountain of dreams? The Storyline, with a series of adventures, is a testimony to the eternal virtues of courage, curiosity and compassion. It gradually becomes a tantalizing tale of an unusual friendship that evolved in the spectacular but dangerous African forests and grasslands teeming with mysterious wildlife, people and their folklores. Experience this classic adventurous narrative in English that will lead you again to an era of picaro, when one dared to dream. This book has also been adapted into a popular Bengali movie.

This comprehensive book is specially developed for the candidates of National MeansCumMerit Scholarship Exam (For Class VIII). This book includes Study Material &

Previous Papers for the purpose of practice of questions based on the latest pattern of the examination. Detailed Explanatory Answers have also been provided for the selected questions for Better Understanding of the Candidates

The classic introduction to the fundamentals of calculus Richard Courant's classic text Differential and Integral Calculus is an essential text for those preparing for a career in physics or applied math. Volume 1 introduces the foundational concepts of "function" and "limit", and offers detailed explanations that illustrate the "why" as well as the "how". Comprehensive coverage of the basics of integrals and differentials includes their applications as well as clearly-defined techniques and essential theorems. Multiple appendices provide supplementary explanation and author notes, as well as solutions and hints for all in-text problems.
