"The rhythmic, onomatopoeic text dances across exuberant watercolors with lots of movement. This celebration of a child's agency in choosing a means of artistic expression strikes just the right note." --Kirkus "A delightful offering for reading aloud, especially during music-themed storytimes." --School Library Journal From New York Times bestselling author Chris Barton and new illustrator Louis Thomas comes a fun, rhythmic picture book about finding the music that is perfect for you! A boy who loves to make noise gets to pick only one instrument (at his parents urging) in a music store, but there is too much to choose from! There's triangles and sousaphones! There's guitars and harpsichords! Bagpipes and cellos and trombones! How can he find the one that is just right for him out of all those options?

Discusses the prerequisites to starting a business and shares his own start-up strategies

Endorsed by the American Association of Sleep Technologists (AAST) and widely used as the go-to text in the field , Fundamentals of Sleep Technology, 3rd Edition, provides comprehensive, up-to-date coverage of polysomnography and other technologies in the evaluation and management of sleep disorders in adults and children. This edition has been extensively updated and expanded to reflect current practice, the latest technology, and the broader roles and responsibilities of the sleep technologist. Content is enhanced with new illustrations, tables, and treatment algorithms. This textbook, written by and for sleep technologists, is the ideal resource for those practicing in the field of sleep medicine or preparing for licensing exams in sleep technology.

Fundamentals of Continuum Mechanics of Soils provides a long-needed general scheme for the study of the important yet problematic material of soil. It closes the gap between two disciplines, soil mechanics and con- tinuum mechanics, showing that the familiar concepts of soil mechanics evolve directly from continuum mechanics. It confirms concepts such as pore pressures, cohesion and dependence of the shear stress on consolidation, and rejects the view that continuum mechanics cannot be applied to a material such as soil. The general concepts of continuum mechanics, field equations and constitutive equations are discussed. It is shown how the theory of mixtures evolves from these equations and how, along with energetics and irrevers- ible thermodynamics, it can be applied to soils. The discussion also sheds light on some aspects of mechanics of materials, especially compressible materials. Examples are the introduction of the Hencky measure of strain, the requirement of dual constitutive equations, and the dependence of the spent internal energy on the stored internal energy. Researchers in engineering mechanics and material sciences may find that the results of experiments on soils can be generalized and extended to other materials. The book is a reference text for students familiar with the fundamentals of mechanics, for scholars of soil engineering, and for soil scientists. It is also suitable as an advanced undergraduate course in soil mechanics.

From the former CEO of Ogilvy & Mather, the first biography of advertising maverick David Ogilvy Famous for his colorful personality and formidable intellect, David Ogilvy left an indelible mark on the advertising world, transforming it into a dynamic industry full of passionate, creative individuals. This first-ever biography traces Ogilvy's remarkable life, from his short-lived college education and undercover work during World War II to his many successful years in New York advertising. Ogilvy's fascinating life and career make for an intriguing study from both a biographical and a business standpoint. The King of Madison Avenue is based on a wealth of material from decades of working alongside the advertising giant, including a large collection of photos, memos, recordings, notes, and extensive archives of Ogilvy's personal papers. The book describes the creation of some of history's most famous advertising campaigns, such as: * "The man in the Hathaway shirt" with his aristocratic eye patch * "The man from Schweppes is here" with Commander Whitehead, the elegant bearded Brit, introducing tonic water (and "Schwepperverseance") to the U.S. * Perhaps the most famous automobile headline of all time--"At 60 miles an hour the loudest noise in this new Rolls-Royce comes from the electric clock." * "Pablo Casals is coming home--to Puerto Rico." Ogilvy said this campaign, which helped change the image of a country, was his proudest achievement. * And his greatest (if less recognized) sales success--"DOVE creams your skin while you wash." Roman also carries Ogilvy's message into the present day, showing the contemporary relevance of the bottom-line focus for which his business ventures are remembered, and how this approach is still key for professionals in the modern advertising world.

A collection of superb landscape photographs by Magnum photographers.

Get the Scoop! Scrapbooking can always be quicker, less complicated and more productive. The secret is knowing the tips and tricks to do it right. Inside Scrapbook Secrets, author Kimber McGray reveals 50 simple secrets to help you scrap better, complete more layouts and have fun along the way. You'll learn insider info on the easiest ways to get the job done, how to make do in a pinch and new techniques that may surprise you. Plus, get 50 extra tips that will make you say "Aha!" over and over again. More than 75 projects illustrate these must-know secrets in action. Get the scoop on how to: Fit multiple photos on a page Fake a hand-stitched border Line up a straight title Pick the proper ink Alter chipboard Cover journaling mistakes And more! With all the info you need to know to be a better scrapper, Scrapbook Secrets will be your new best friend.
