nosologically independent phenomena is paradigmatically corroborated in an especially impressive way by the study of tropical diseases. And so the idea suggested itself that we should present the main pathological patterns from the field of tropical pathology with particular reference to their interconnection. We soon came to the firm conclusion that such a compilation could be successfully undertaken only by a pathologist from the English-speaking world. The classic practical knowledge of our British colleagues, which has matured in world-wide experience, would be bound to find its ideal verification here. And so we turned for help to our friend Prof. WALTER PAGEL (Dr. med., Dr. h. c. Basle, Dr. h. c. Heidelberg) in London. He immediately referred us to Prof. HERBERT SPENCER. That we managed to enlist the help of Professor SPENCER is entirely due to Professor PAGEL's kind offices. We owe the fact that the undertaking has been completed in relatively so short a time to Professor SPENCER's exceptional knowledge both of his subject and of the field-workers themselves.
